fastrls	<i>Recursively list files and directories</i>
---------	---

Description

Recursively list files and directories

Usage

```
fastrls(  
  dir,  
  include_dirs = TRUE,  
  include_files = TRUE,  
  include_links = TRUE,  
  follow_links = TRUE,  
  n_threads = 2L  
)
```

Arguments

<code>dir</code>	string: starting directory
<code>include_dirs</code>	logical: if TRUE, include directories in the results
<code>include_files</code>	logical: if TRUE, include files in the results
<code>include_links</code>	logical: if TRUE, include links in the results
<code>follow_links</code>	logical if TRUE, follow symbolic links
<code>n_threads</code>	integer: if > 1, use multiple threads. Might be counter-productive on hardware that can't cope with simultaneous requests (spinning disks?)

Value

A character vector
